

ENERGY HARVESTING WORKSHOPS

In support of the Organizing Committee and EH Dialog project, we warmly invite you to take part in ENERGY HARVESTING WORKSHOPS in frame of the 10th International Conference on Wave Mechanics and Vibrations. The EH workshops will be organized on the last day of conference after the end of main conference programme, on 6th of July.

Workshops will be divided into two events:

- Presentation “*Vibration Energy Harvesting: Modelling and Simulations*” by Prof. Grzegorz Litak including downloading Matlab codes by participants to individual analysis.
- Poster session for young researchers including students and PhD candidates. The session will be organized in the hybrid form. Participant are invited (it is not obligatory but recommended) to record or present its short (3-5 minutes) poster’s invitation with the introduction of the authors and the poster title. The best poster will be selected with an award of one week visit to the Energy Harvesting Laboratory at Lublin University of Technology, Poland.

We kindly wait for your notification till **26/06/2022** by sending the poster in pptx or pdf formats to the address: p.wolszczak@pollub.pl. We are looking forward to your contribution.
